ARKASHISH SUTRADHAR

Software Engineer — AI Products & Full-Stack Engineering

+91-9830679643 · arkashish.sutradhar@gmail.com · Kolkata, India · LinkedIn · GitHub · Portfolio · LeetCode

SUMMARY

AI product engineer with 3 years of experience shipping production GenAI systems and MERN-stack applications for enterprise users. Built and deployed two RAG-based agents on Microsoft Copilot Studio (LangChain, GPT-4o-mini, DeepSeek v2) used daily by client teams, cutting analysis and ticket-resolution time from hours to minutes. Comfortable owning a feature end-to-end — prompt/retrieval design through REST APIs to React front ends. Peak LeetCode rating 2039 (Global Rank 570), 1,500+ problems solved.

EXPERIENCE

Software Developer — TCS, Kolkata **Oct 2023 – Present**

- Designed, built, and deployed two RAG-based GenAI agents on Microsoft Copilot Studio, in daily production use by enterprise client teams:
- **CSV Analyzer Agent** — answers questions grounded strictly in uploaded CSVs and auto-generates chart visualizations on request, cutting data-analysis turnaround from hours/days to minutes.
- **Ticket Resolution Agent (Ivanti Service Management)** — surfaces similar historical tickets and past resolutions automatically on new ticket creation, reducing time-to-resolution for support teams handling hundreds of monthly tickets.
- Evaluated model outputs against real failure cases, tuning prompts and retrieval logic to improve grounding accuracy and cut hallucinated responses; reduced inference cost and response latency by refining prompt structure, context size, and retrieval scope.
- Built a multi-agent GenAI system (DeepSeek v2 + GPT-4o-mini + Streamlit) for real-time insurance comparison, showcased at the TCS AI Hackathon.
- Built REST APIs, backend modules, and MERN-stack components integrating AI outputs with enterprise workflows.
- Additionally delivered platform engineering work: optimized PeopleSoft HCM batch jobs (40% faster) and automated 20+ QA test cases via Katalon Studio in CI/CD (70% efficiency gain).

PROJECTS

Arkafolio — AI-Powered Portfolio Live *LLM Assistant · Vercel*

- Personal portfolio with an embedded LLM assistant that answers questions about my experience, projects, and skills in natural language.

FoodApp Live | GitHub *React · Next.js · Express · MongoDB · Firebase · Stripe*

- Full-stack food-ordering platform with cart, menu pagination, admin dashboard, JWT auth, and Google Sign-In; Stripe checkout with a 99% payment success rate.

Google Meet Clone GitHub *Next.js · ZegoCloud · NextAuth · MongoDB*

- Full-stack video conferencing app with real-time audio/video, Google OAuth, role-based controls, and responsive Tailwind + Radix UI.

AI Resume Screener GitHub *Python · LLM (Groq) · Pydantic · pypdf · python-docx*

- Two-stage LLM pipeline that parses PDF/DOCX resumes and JDs into schema-validated JSON, then scores and ranks candidates; ~60% ranking accuracy on a labelled test set in early evaluation.

Multi-Agent Insurance Policy Comparator *DeepSeek v2 · GPT-4o-mini · LangChain Agents · Streamlit · Python*

- Built a multi-agent Python pipeline for extracting and comparing insurance policies, generating structured summaries.

TECHNICAL SKILLS

Generative AI: LLMs (GPT-4o, DeepSeek, Claude) · Microsoft Copilot Studio · LangChain · RAG Pipelines · Multi-Agent Systems · Prompt Engineering · Streamlit
MERN & Frontend: MongoDB · Express.js · React.js · Node.js · Next.js · Redux · Tailwind CSS · Bootstrap
Backend: FastAPI · Spring Boot · Kafka · REST APIs
Languages: JavaScript · Python · Java · C++
Databases: MongoDB · MySQL · SQL · Databricks
Cloud / DevOps: AWS · Firebase · Docker · Git · CI/CD · Postman · Katalon Studio

EDUCATION

B.Tech. in Computer Science Engineering — 9.1 DGPA, Heritage Institute of Technology, Kolkata **2019–2023**
ISC — 92% · Indian School Certificate · 2019 **ICSE — 90%** · Indian Certificate of Secondary Education · 2017

CERTIFICATIONS

Databricks Certified Data Engineer Associate · **Claude Certified Associate – Foundations** (Anthropic)
Generative AI Leader (Google Cloud) · **McKinsey.org Forward Program**

ACHIEVEMENTS

- Peak Global Rank of 570 on LeetCode Weekly Contest · Outstanding Contribution Award **×2** at TCS · Top ILP Performer · Commended for InfoSecurity Fest 2025.
