ARKASHISH SUTRADHAR

Software Engineer — AI Products & Full-Stack Engineering

+91-9830679643 · arkashish.sutradhar@gmail.com · Kolkata, India · LinkedIn · GitHub · LeetCode (Global Rank 570)

SUMMARY

AI product engineer with 2+ years shipping production GenAI systems and full-stack apps for enterprise users. Built and deployed two RAG-based agents on Microsoft Copilot Studio (LangChain, GPT-4o-mini, DeepSeek v2) used daily by client teams, cutting analysis and ticket-resolution time from hours to minutes. Comfortable owning a feature end-to-end — prompt/retrieval design through REST APIs to React front ends. Peak LeetCode rating 2030 (Global Rank 570), 1,500+ problems solved.

EXPERIENCE

Software Developer — TCS, Kolkata *Oct 2023 – Present*

- Designed and deployed two RAG-based GenAI agents on Microsoft Copilot Studio, in daily production use by enterprise client teams:
- CSV Analyzer Agent — answers questions grounded strictly in uploaded CSVs and auto-generates chart visualizations on request, cutting data-analysis turnaround from hours/days to minutes.
- Ticket Resolution Agent (Ivanti Service Management) — surfaces similar historical tickets and past resolutions automatically on new ticket creation, reducing time-to-resolution for support teams handling hundreds of monthly tickets.
- Evaluated and iterated on model outputs against real failure cases, tuning prompts and retrieval logic to improve grounding accuracy and cut hallucinated responses.
- Optimized inference cost and response latency by refining prompt structure, context size, and retrieval scope across both production agents.
- Built a multi-agent GenAI system (DeepSeek v2 + GPT-4o-mini + Streamlit) for real-time insurance comparison, showcased at the TCS AI Hackathon; built REST APIs, backend modules, and MERN-stack components integrating AI outputs with enterprise workflows.
- Additionally delivered platform engineering work: optimized PeopleSoft HCM batch jobs (40% faster) and automated 20+ QA test cases via Katalon Studio in CI/CD (70% efficiency gain).

PROJECTS

Multi-Agent Insurance Policy Comparator *DeepSeek v2 · GPT-4o-mini · LangChain Agents · Streamlit · Python*

- Built a multi-agent pipeline for extracting and comparing insurance policies, generating structured summaries.

Google Meet Clone GitHub *Next.js · ZegoCloud · NextAuth · MongoDB*

- Full-stack video conferencing app with real-time audio/video, Google OAuth, role-based controls, and responsive Tailwind + Radix UI.

FoodApp Live | GitHub *React · Next.js · Express · MongoDB · Firebase · Stripe*

- Food-ordering platform with cart, menu pagination, admin dashboard, JWT auth, and Google Sign-In; Stripe checkout with a 99% payment success rate.

AI Resume Screener GitHub *Python · LLM (Groq) · Pydantic · pypdf · python-docx*

- Built an end-to-end resume-screening pipeline: parses PDF/DOCX resumes and JDs into structured, schema-validated data via LLM extraction, then scores and ranks candidates with a second LLM stage — enforcing structured JSON output to prevent hallucinated fields.
- Achieved ~60% ranking accuracy against a labelled test set in early evaluation, with ongoing tuning of prompts and matching logic.

TECHNICAL SKILLS

Generative AI: LLMs (GPT-4o, DeepSeek, Claude) · Microsoft Copilot Studio · LangChain · RAG Pipelines · Multi-Agent Systems · Prompt Engineering · Streamlit
Languages: JavaScript · Java · C++ · Python
Frontend: React.js · Next.js · Redux · Tailwind CSS · Bootstrap
Backend: Node.js · Express.js · Spring Boot · REST APIs
Databases: MongoDB · MySQL · SQL
Cloud / DevOps: AWS · Firebase · Docker · Git · Postman · Katalon Studio

EDUCATION

B.Tech. in Computer Science Engineering — 9.1 DGPA
Heritage Institute of Technology, Kolkata · 2019–2023
ISC — 92% · Indian School Certificate · 2019
ICSE — 90% · Indian Certificate of Secondary Education · 2017

ACHIEVEMENTS

- Achieved Peak Global Rank of 570 on LeetCode Weekly Contest ·Outstanding Contribution Award ×2 at TCS · Top ILP Performer. Commended for InfoSecurity Fest 2025.
